In this virtual forum, Henry A. Nasrallah, MD and Rifaat El-Mallakh, MD, will review foundational concepts related to the cytochrome p-450 system with an emphasis on current genetic testing capabilities, issues related to individual variability, and impact on treatment, tolerability, and outcomes. Speakers will also explore the differences between biomarkers and genetic testing, and will end with a discussion of potential trends in the future for personalized medicine.

Featuring:

Rifaat El-Mallakh, MD
Rif El-Mallakh, MD, is a Professor and the Director of the Mood Disorders Research Program in the Department of Psychiatry and Behavioral Sciences at the University of Louisville School of Medicine in Louisville, Kentucky.
