VIRTUAL FORUM

Psychiatric Illness Identification & Treatment For Mass Casualty Event Survivors & First Responders (Emergency Relief Series Part 1)

Thursday, November 15, 2018 | 12pm ET | 9am PT

Psychiatric illnesses are common among survivors of man-made mass casualty incidents. The symptoms and conditions experienced can even be experienced by first responders, and are distinct from symptomology experienced following other events like natural disasters. In this Virtual Forum, Allan Chrisman, MD, and Richard Weisler, MD, will discuss data related to the psychological and physiological impressions caused by man-made mass casualty events, including intervention strategies for coping with stress, the necessity of psychological first aid, and the impact that building resiliency can have for communities, survivors, and first responders.

Speakers are paid consultants to Otsuka Pharmaceutical Development & Commercialization, Inc.

Allan K. Chrisman, MD
Associate Professor Emeritus,
Duke University School of Medicine

Rick Weisler, MD
Adjunct Professor, University of North Carolina
Chapel Hill & Duke University; & Distinguished Life
Fellow, American Psychiatric Association

Jacquelyn Canning, PharmD, BCPP, Medical Science Liaison,
will be the moderator of this event.
